

QUICK LESSON FOR THOSE ON THE GO

(For this lesson, if possible, use the 1984 New International Version)

Lesson is from Genesis 1:1-8

(v.1) In what? God did what?

(v.2) The earth was what two? Darkness was where? Who was hovering over the waters?

(v.3) Who said? He said let there be what? And there was what?

(v.4) God saw that the light was what? What did God separate?

(v.5) What did God call the light? What did God call the darkness?

(v.5) There was what two? These made up the first what?

(v.6) God said let there be what between the waters? Why?

(v.7) Who made the expanse? Who separated the water under the expanse from the water above it?

(v.8) What did God call the expanse? And there was what two? The second what?

Thoughts to ponder:

What do these verses teach you about the power of God?

Note again how God described a day (v.5 & v.8). How do we currently describe a day?

Why do you think God started by creating the light?

What do you think was the purpose of the water above?

Do we know what was before “the beginning”?

Got questions about the lesson, let me know.
